

# Automated Network Request Management in ServiceNow

## Step 1: Login to ServiceNow

First open ServiceNow Developer Instance in a browser.  
Enter username and password and login the instance.

## Step 2: Navigate to Service Catalog

In the left-side search bar (Application Navigator), type: Service Catalog  
Click on: Maintain Items

## Step 3: Create a New Catalog Item

Click the New button (top right).  
A new form will open.

## Step 4: Fill Catalog Item Details

Name: Network Request  
Catalog: Service Catalog  
Category: Network Services

If “Network Services” is not available, create a new category.

## Step 5: Save the Catalog Item

Click Submit.  
Your catalog item is now created successfully.

The screenshot shows the ServiceNow web interface for creating a new catalog item. The browser address bar shows the URL: `dev193047.service-now.com/now/nav/ui/classic/params/target/sc_cat_item.do%3Fsys_id%3D0bc7d97ec83a447104b03a370cead39c%26sysparm_record_target...`. The page title is "Catalog Item - Network Request". The form includes the following fields and values:

- Name:** Network Request
- Catalogs:** Service Catalog
- Category:** Network Services
- State:** --None--
- Checked out:** --None--
- Owner:** System Administrator
- Application:** Global
- Active:** ☒
- Fulfillment automation level:** Unspecified

Below the form, there are tabs for "Item Details", "Process Engine", "Picture", "Pricing", and "Portal Settings". The "Item Details" tab is active, showing a "Short description" field and a "Description" field with a rich text editor. The Windows taskbar at the bottom shows the time as 7:48 PM on 28-Apr-20.

## To check the created catalog item is working or not
